

# BUCKTHORN MANAGEMENT

*Female Buckthorn on Itasca SWCD property.*

## Why is buckthorn a problem?

Buckthorn is a threat to future forest habitats across all landscapes. It shades out other native plants and degrades native wildlife habitat. This session will help individuals identify this invasive plant and methods for control.

- Hand pulling demonstration
- Cut stump treatment
- Chemical control
- Non-chemical control

**October 26, 2020**      **9AM-12PM**

1895 W U.S. Hwy. 2 Grand Rapids, MN 55744

Please call Tim Frits @ 218-910-7652 for registration form and questions, can also register day of event.

“Face coverings are required to be in place if and when minimum six foot spacing cannot be maintained from another individual”
