

## **COLERAINE RESIDENTS**

### ***The City of Coleraine needs your help!***

There are approximately 70 fire hydrants in the City; they are marked with red and white fiberglass sticks. With all the snowfall this year, the Trout Lake Fire Department has a challenge to access the hydrants in case of an emergency.

The City is asking residents if you would kindly adopt a fire hydrant in your area. What does this mean? Basically, this means that every time it snows when you are shoveling or snowblowing out your property that you take a few minutes and clean out the area from the road to that hydrant near you. Ideally, we would like two volunteers for each hydrant.

The City asks that you stop in to City Hall, call 218-245-2112, or e-mail: [banderson@cityofcoleraine.com](mailto:banderson@cityofcoleraine.com), to provide your name, address, and the location of the fire hydrant that you are willing to adopt.

Thank you for being willing to help the City, Trout Lake Fire Department, AND your neighbors!
