agenda item

Briana:

I understand that the City has an agreement with MnDOT to take care of the street lights at the intersection of CSAH 61 & Hwy 169. There are currently 3 lights there. One in each quadrant with the exception of the SW quadrant. The plan is to move the existing light in the NW quadrant to the new pole with the flashers on it. That will provide the best lighting for the crossing at night. I would like to add another light to the SW quadrant. I am wondering if the City would consent to also take care of this light long term. Let me know who I should talk with to determine that. Thanks
